If there's any "story" of quality I can tell it best

The story of quality is interesting to all who purchase. Quality is no more important in any other one thing in the world than in rubber. Rubber qualities can be weakened or adulterated or "mixed" as well as can drug qualities or anything else. Quality counts for a great deal in rubber because if you do not get quality you do not get the best wear. The uses of a piece of rubber are vital enough so that quality is essential because you cannot afford to have it split, tear or break by accident.

> Some Things Needed Now and Which I Have

Hot water bottles, fountain syringes, bulb syringes, tubes, rubber gloves, nipples, rubber sponges, rubber brushes, atomizer bulbs and ice caps, to say nothing of the more seldom called for, but none the less essential, enema in tubes, irrigators, breast pumps and surgical needs. I have all these things of rubber. I have all of them in the best of qualities. Economy is illustrated in the initial cost and the long time these goods will wear. My say-so should be enough to warrant your purchases here but my guarantee is better. I guarantee every piece of rubber I sell.
